

# Curv Restaurant Cuboh Guide

What Curv's Cuboh  
Integration has to offer.

# Cuboh Overview

Cuboh consolidates online orders and offers users a variety of valuable features such as:

## **Unified Dashboard:**

View all platform activity in one place.

## **Third-Party Integrations:**

Seamless integration with popular delivery apps.

## **Menu Management:**

Update menus across multiple platforms.

## **Order Management:**

Accept or reject online orders from a single interface.

## **24/7 Support:**

Standard around-the-clock customer support.

# Hardware Overview

\$2,199.95

Curv Restaurant  
Cuboh Integration Available

Cuboh is not available on devices that accept payments such as the PAX e800 and Elys Tablet.

To use the Cuboh integration with these devices, a Galaxy tablet must be added on to the bundle.

\$2,409.95

# Cuboh on Curv Platform

## Ordering tab

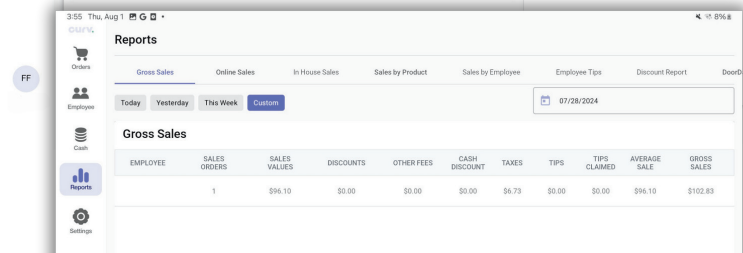

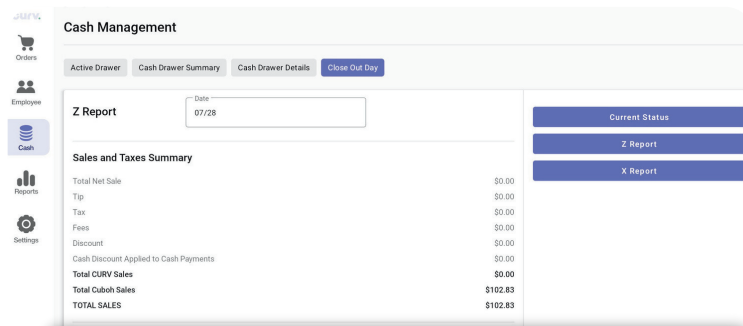

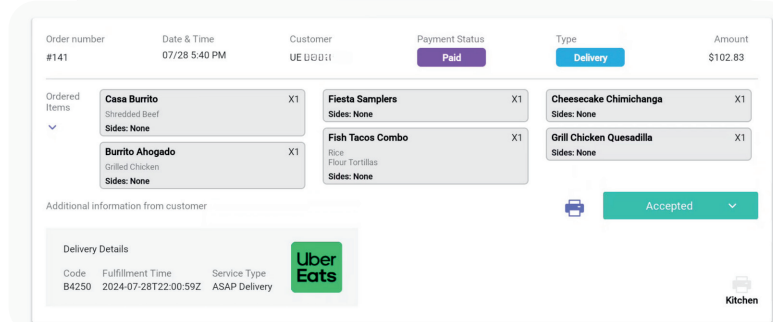

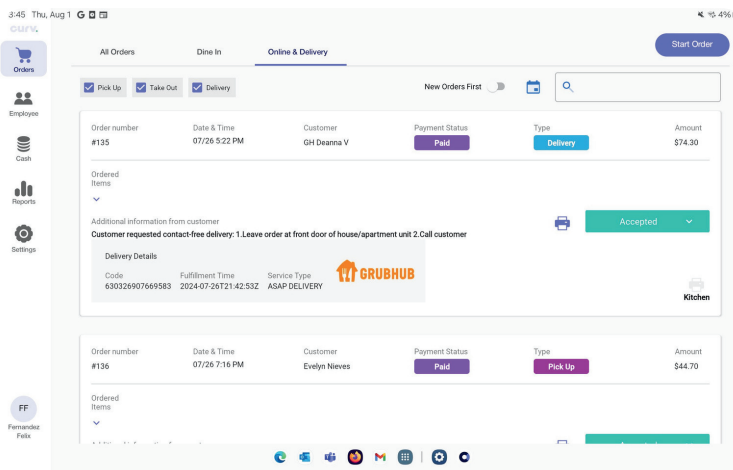

- Cuboh Orders can be seen on the Online & Delivery tab within the orders tab.
- Orders will display the platform logo they came in on along with a custom order code.
- Orders that have been automatically accepted through Cuboh can be rejected on the Curv Order by pressing the Blue “Accepted” button on the right of the order and changed to “Reject”.
- Third Party Order Cancellation Time Limits will apply and are not standardized within Curv.
- All order or processing errors will be handled by the Third Party App the order came from.

## Reports

- Cuboh Order can be seen on the Online Delivery tab within the orders tab.
- Orders that came through Cuboh will be reflected in the sales summary reporting under “Gross Sales”.

## Support

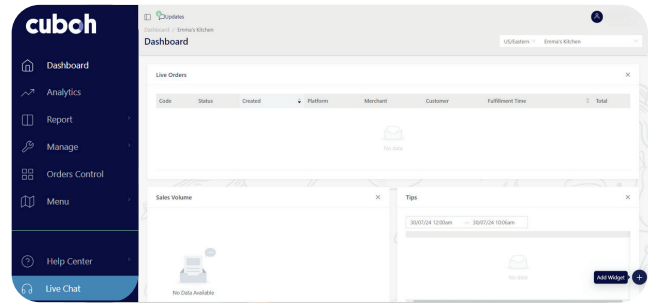

- For all questions or concerns please contact [support@curvpos.com](mailto:support@curvpos.com)

# Platform & Navigation

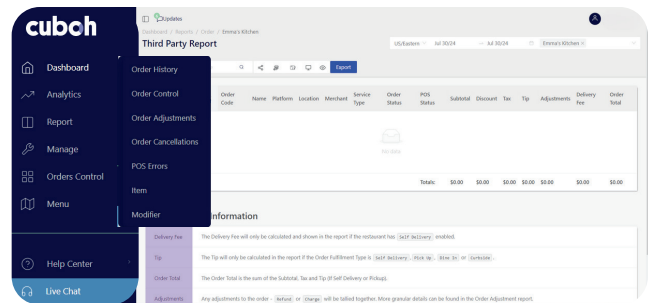

## Dashboard

- Provides an overview of all activity across various platforms.
- Fully customizable; merchants can choose which reports to view quickly.

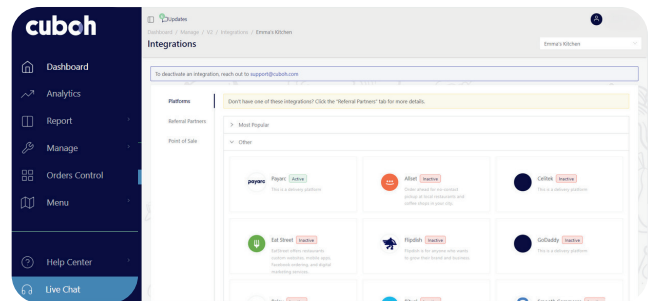

## Reports

- Comprehensive overview including:
  - Order History
  - Order Control
  - Order Adjustments
  - Order Cancellations
  - POS Errors
  - Item Reporting
  - Modifier Reporting

## Manage Tab

- View current integrations.
- For installation or deactivation, contact: [support@curvpos.com](mailto:support@curvpos.com)

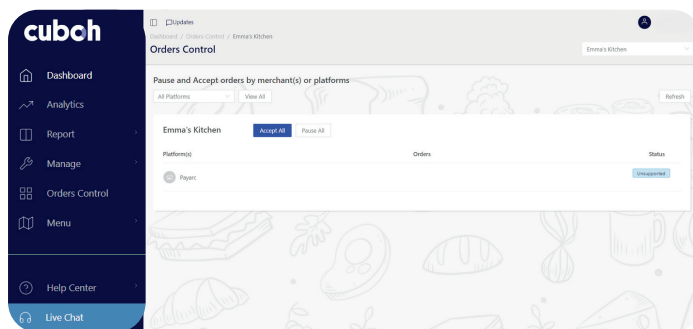

[See Integration Form Here](#)

# Platform & Navigation

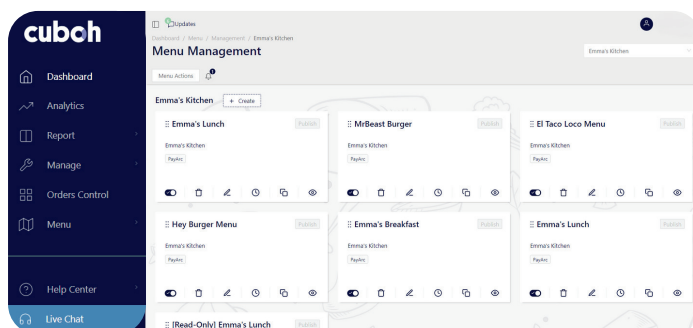

## Order Control

- Choose which apps to accept orders from.
- Ability to limit platforms during high order volumes or pause all and focus on physical location orders.

## Menu Management

- Set up and manage menus for different time spans.
  - Example: Breakfast (6 AM - 10 AM), Lunch (10:01 AM - 4 PM), Dinner (4:01 PM - 9 PM).

# Integration with Popular Third-Party Delivery Apps

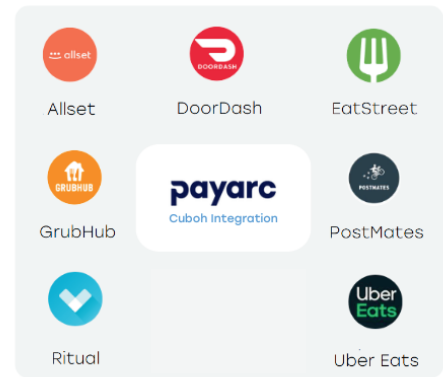

## Supported Apps:

- DoorDash
- Uber Eats
- Ritual
- GrubHub
- Allset
- EatStreet
- PostMates

## Cuboh Account Integration Guides:
